

Download Disease Prevention And Treatment

Prevention. There is currently no vaccine in the United States to protect against the viruses that cause hand, foot, and mouth disease. But researchers are working to develop vaccines to help prevent hand, foot, and mouth disease in the future.*Recent publications suggest the efficacy of shorter courses of treatment for early Lyme disease. NOTE: For people intolerant of amoxicillin, doxycycline, and cefuroxime axetil, the macrolides azithromycin, clarithromycin, or erythromycin may be used, although they have a lower efficacy. People treated with macrolides should be closely monitored to ensure that symptoms resolveGum disease is an inflammation of the gum line that can progress to affect the bone that surrounds and supports your teeth. The three stages of gum disease — from least to most severe — are gingivitis, periodontitis and advanced periodontitis. Bacteria in plaque, a sticky, colorless film that ...Heart disease remains the leading killer in America, but even if you have a family history, heart disease and heart attacks are not inevitable.
