

Download Energy Accounts Architectural Representations Climate

Reviews "In a culture of images, visual narratives are as important as arguments. Architects think with their eyes, and the authors of Energy Accounts are phenomenally qualified to present academic research and professional experiences on energy and climate with graphic eloquence. His research and writing focus on the intersection of architecture and technology. He is the author of The Emerald City and Other Essays on the Architectural Imagination, and co-editor and contributor to Architecture and Energy: Performance and Style. William W. Braham is a Professor of Architecture at the University of Pennsylvania. Energy Accounts: Architectural Representations of Energy, Climate, and the Future Dan Willis , William W.
