

Download Not Always A Green Light....

“Stupid light”: Why light is not necessarily right, and why lighter is not necessarily better I had a wonderful experience with Fresh Green Light. The instructors make you feel comfortable both on the road and in the classroom. You can come to class based around YOUR schedule, which is very convenient. Figure 1: When full-spectrum light hits the leaves of a plant, the photosynthetic pigments absorb much of the red and blue light. Therefore, the light reaching the lower leaves of the canopy is enriched in green and far-red light. Small Corners (1978) Green Light (1978) Thank You Very Much (1979) - Not Always A Green Light....
