Bone is not uniformly solid, but consists of a flexible matrix (about 30%) and bound minerals (about 70%) which are intricately woven and endlessly remodeled by a group of specialized bone cells. Marlena Kruger is an established researcher with a strong background in bone health research. She is widely published in this area. Marlena has a strong track record in research on food for health and well-being with a focus on maintenance of mobility with ageing. 11 th International Conference on . Predictive, Preventive and Personalized Medicine & Molecular Diagnostics Oct 23-24, 2019 Amsterdam, Netherlands Amenorrhoea is the absence of a menstrual period in a woman of reproductive age. Physiological states of amenorrhoea are seen, most commonly, during pregnancy and lactation (breastfeeding), the latter also forming the basis of a form of contraception known as the lactational amenorrhoea method. - Osteoporosis And Metabolic Bone Diseases Proceedings Of The 1st International
